

Cambridge, OH Chooses Comcate Code Enforcement Software

City to Implement Industry Leading Hosted Software

The Challenge:

The city of Cambridge, OH, with a population of 13,000, is nestled in the Appalachian Mountains at the intersection of three major freeways. Code Enforcement management were mindful of the town motto of “Together we Can Make a Difference” in their decision to implement code enforcement software to improve the level of service they can deliver to citizens.

The Solution:

Management selected industry leading Comcate Code Enforcement Manager Software. Comcate’s hosted software model saves money for the city because no additional hardware or support services are needed at the department. Because the easy-to-use software is accessed via the web, officers are more effective in the field with the sophisticated case management and reporting functionality enjoyed by larger municipalities.

Summary:
