

Morgan, UT Looks to Industry Leader for Best Practice Recommendations

New Department Implements Comcate Software, Taps Comcate's Knowledge Base on Infrastructure, Process and Best Practices

The Challenge:

The small city of Morgan, Utah has big ambition and now a world class code enforcement department to provide excellent service to citizens. When city management decided to create the new code enforcement department, they looked to the industry leader, Comcate, for software and advice.

The Solution:

Comcate, Inc., the leading provider of CRM software nationwide, offers mobile code enforcement software that makes officers more efficient in the field and better able to manage more cases and large territories more effectively. Because Comcate has performed so many implementations and has so much experience with departments across the country, Morgan asked Comcate for their recommendations on department process, procedures and best practices.

Summary:

Comcate is proud and happy to provide excellent solutions and best practice recommendations to mall cities like Morgan. Comcate is well known for its own excellent customer service and reputation with satisfied customers. For more information on Comcate software or for a demonstration or consultation, email info@comcate.com.
