Bellevue, KY Implements Comcate Software for Code Enforcement

City Improves Efficiency and Effectiveness of Managing Code Enforcement Cases and Activities

The City of Bellevue, Kentucky has 6,480 residents and a commitment to preserving the past and preparing for the future. The City Administrator, city Historic Preservation Officer and an Animal Control Inspector wanted a system to track and manage enforcement activities. They wanted software that would let them access live data in the field, use standardized pre-populated forms, export data in Excel, upload supporting photographs into cases, and easily identify the city's rental properties.

The City of Bellevue investigated Comcate's code enforcement software solution being used by the City of Covington. Comcate's easy-to-use interface, rich functionality and affordable hosted software model are all distinguishing characteristics. Comcate code enforcement software is so effective in improving productivity, compliance and case processing that the software investment can quickly pay for itself.
