El Dorado Hills Community Services District Expends Use of Comcate

District's Positive Experience with Code Enforcement Software Justifies Expanded Use

The El Dorado Hills Community Services District's 42,000 residents have benefitted from improved code enforcement services since the District first decided to implement Comcate software. Comcate's Code Enforcement Manager software lets officers cover more territory per officer and manage more cases per officer, from their vehicle and without needing to return to the office to print violation notices, schedule follow-up visits or generate activity reports.

Comcate software quickly pays for itself through increased efficiency and improved compliancy. Comcate's affordable hosted software model doesn't require additional hardware or on-site support at client sites, and makes sophisticated state-of-the-art functionality available to even small towns and districts.

For more information on Comcate software, please email info@comcate.com.
