## **Palm Beach, FL Improves Code Enforcement Efficiency, Compliancy, Collections**

### **Fast Web-based Hosted Implementation Gives Officers GIS Mapping, Field Access to Cases**

Citizens of sunny Palm Beach enjoy the well maintained community provided by their town's code enforcement officers. The officers are determined to maximize their efficiency in the field and will now be able to access activity reports and generate violation notices with calculated fines without needing to return to their office.

Affordable hosted software lets officers have instant access to property histories, past violations, frequent offender reports, grant reporting and the generation of notices with pre-populated fields at the click of a button. All actions and communications are automatically documented and supporting photos and documents are stored with cases.

Compliancy improves with standardized case management. Collections improve with faster processing of well documented cases by the courts. Officers can cover more territory and manage more cases per officer. The software quickly pays for itself and management can objectively prove the return on investment in code enforcement.
