Comcate is proud to introduce Animal Control Manager, with an interface that allows for the streamlining and standardization of animal control case management.

- Drives efficiency in processes.
- Remote access to cases and code data giving officers the ability to communicate with others.
- Generate notices and schedule visits in the field, and standardization of the case management process increase effectiveness.
- Officers can generate activity and case aging reports to gain insight into violations and repeat offenses.
- Additional GIS integration enables officers to view the geographical locations of cases.

No Hardware or Software to Install
Comcate hosts your software in the cloud to ensure 24/7 web access and connectivity, with robust network and power redundancies and round-the-clock system monitoring. Your agency does not have to purchase any new hardware or software.

Comcate’s Animal Control Manager web-based software simplifies the resolution of violations and cases, provides powerful case management, and improves citizen awareness and compliance.

Easy to Implement, Easy to Use
Animal Control Manager is customizable to meet your agency’s specific needs. It is user-friendly, intuitive and requires just one hour of training to get started.

Local Government Program Expertise
Comcate brings over 10 years of experience implementing municipal programs. Comcate expertise allows for effortless integration between the Animal Control module, citizen engagement, and case reporting.
Optimized for Field and Office Use
Animal Control Manager uses an upgraded, responsive design that is optimized for iPad, allowing officers to easily manage cases from anywhere in the field, leveraging modern GIS. It also gives local agencies the ability to manage multiple entities at once like animal control and general code enforcement through the integrated enforcement suite.

Efficient Case Management
Efficiency is the focus at Comcate in improving the effectiveness of public agencies. By eliminating reliance on paperwork and manual processes Comcate has built automation into the workflow, improving the number of cases an officer can address each day. Furthermore, cases are completed with greater accuracy and are routed automatically to the appropriate staff throughout the agency.

Integrated Code Enforcement Solution
Comcate has developed an integrated platform, which runs Code Manager, Animal Control Manager and Abandoned Vehicle Manager. This integration makes it easier to manage cases across the department and to cross-train employees.

Increased Visibility Into the Workday
Comcate gives supervisors the tools they need to review the work of their officers. How many cases are they able to close in a week’s time? How much time are they spending per case? These are questions Animal Control Manager can easily answer with customized reports that can be generated daily, weekly, monthly or annually.

At Comcate, we believe in empowering public agencies.

Founded in 2001, Comcate offers cloud-based solutions for governments and local municipalities that deliver results. Comcate solutions help agencies effectively execute crucial programs, efficiently manage their assets and improve service to local citizens through program-based offerings. Drawing on the expertise of retired city managers and Silicon Valley technologists, Comcate promotes improved productivity and cost savings for local government while enhancing community involvement for their residents.

Comcate supports the functions of local governments providing outstanding service to their communities in more than 30 states and logs over 20,000 client cases each month. As a leading national provider of customized agency solutions, Comcate offers cloud-based citizen engagement, code enforcement, animal control, public records management, permits and more, delivering software that is affordable, easy-to-use and promotes interaction between agencies and citizens through advanced mobile technology.
