

# BUILDING AND SAFETY MANAGER

The mobile, affordable and easy-to-use software for building inspectors, safety inspectors and fire inspectors to increase the efficiency and the standardization of inspections.

Comcate is proud to introduce Building and Safety Manager – mobile and affordable software that improves the efficiency and standardization of building and safety inspections.

- Inspectors trust Building and Safety Manager for critical inspections.
- Inspectors are more effective, inspections are more standardized.
- Remote access to cases and code data, the ability to communicate with other inspectors, the ability to generate notices and schedule visits in the field, and the standardization of customizable inspections check lists increase inspector effectiveness.
- Inspectors can generate activity reports and reports with case aging to gain insight into violations, repeat offenses

and inspection activity. Optional GIS integration gives inspectors the geographical locations of cases.

The screenshot displays the software interface with a search form on the left and a table of inspection cases on the right.

View	Report	RFI Class	RFI Case #	Status	Priority	Outage	Location
View	edit	BFS08-33		Complaint Filed	Expired Permit		1176 R St
